Call for Papers

Sponsored by SCS, the Society for Modeling and Simulation International, IMAACA 2004 will be held jointly with several other international conferences as part of I3M 2004: Advanced Vehicle Control and Safety (AVCS 2004), Workshop on Modeling and Applied Simulation (MAS 2004), Environmental and Life Science Simulation Conference (ELSSC2004), as well as Conceptual Modeling and Simulation (CSM 2004).

Objectives and Scope

IMAACA 2004 will bring experts together for the purpose of presenting and discussing all type of application relevant control and automation problems emphasizing the role of model analysis as integral part of the complete design of the automated system. Particularly, it will focus on new concepts, methods, techniques, and tools conceived in order to support an integrative interplay of modeling, identification, simulation, system analysis and control theory in all the stages of system design.

Topics

Application Areas

Submission

All submissions are to be sent electronically to the conference chairs E-mail addresses: gdt@ec-lille.fr, sjunco@fceia.unr.edu.ar

Paper Submissions: Only original papers written in English will be considered on the basis of a full paper revision. After a first review by the two Chairs for general suitability to the conference, each full paper will be reviewed by members of the IPC. Please send drafts of about 12-17 pages, double-spaced, pdf or ps format. Attach a file specifying "IMAACA 2004", and stating author’s names, affiliations, mail addresses, telephone and FAX numbers, and E-mail addresses.

Special and Invited Sessions: Session proposals should include a minimum of five papers, a session title, a list of the topics covered, and the qualifications and brief biography of the session organizers.

Tutorials: Include a title, the subject description, and the qualifications and a brief biography of the proposed presenter.
